SUMMARY

Full Stack Developer with hands-on experience building web applications using Python, JavaScript, TypeScript, React.js, Next.js, Node.js, Express.js, and REST APIs. Experienced in full-stack development, API integration, database-driven applications, and responsive UI development. Built applications across e-commerce, car management, and student management domains. Proficient in agile methodologies, version control with Git, and deploying production-ready applications. Strong foundation in software development, data structures, and problem solving.

EDUCATION

Dr. Bhimrao Ambedkar University (DBRAU), Agra 2024 – 2027
Bachelor of Computer Applications (BCA), Computer Science Agra, India

TECHNICAL SKILLS

Languages: Python, JavaScript, TypeScript, SQL, HTML, CSS
Frontend: React.js, Next.js, Tailwind CSS, Bootstrap, Responsive UI/UX
Backend: Node.js, Express.js, Python, Flask, REST APIs
Databases: PostgreSQL, MongoDB, Prisma ORM
Tools: Git, GitHub, VS Code, Postman, Vercel, Render

EXPERIENCE

DUCAT India Mar 2026 – Aug 2026
Apprenticeship – MERN Full Stack Remote

- Developed full-stack web applications using **MongoDB, Express.js, React.js, and Node.js**, building reusable components, REST APIs, responsive interfaces, debugging workflows, and Git-based version control.
- Implemented authentication flows, form validations, and state management using React hooks and context API, ensuring secure and maintainable application architecture across multiple project modules.

S O Infotech (P) Ltd. Dec 2025 – Jul 2027
Full Stack Developer Trainee – Python Noida, India

- Engineered an **E-commerce Website** using Python Full Stack architecture with **Generative AI** features, connecting frontend functionality with AI-driven backend services in a cross-functional team environment.
- Collaborated with senior developers to design RESTful APIs, integrate third-party payment gateways, and optimize database queries, reducing page load times and improving overall application performance.

PROJECTS

AI-Powered E-commerce Website GitHub

- Built a full-stack e-commerce application with AI-powered functionality, featuring product catalogue management, responsive UI, RESTful API integration, dynamic search, secure checkout, AI-driven recommendations, user authentication, order tracking, and an admin dashboard for inventory and analytics.

CarVerse – Car Management System GitHub

- Developed a comprehensive car management system using the **MERN stack (MongoDB, Express.js, React.js, Node.js)**, implementing full CRUD operations, advanced search/filter, admin dashboard with real-time inventory tracking, image upload, paginated views, and role-based access control for desktop and mobile.

VidyaSanchar – Student Management System GitHub

- Built a student management system using **React, Node.js, and PostgreSQL**, featuring enrollment, attendance tracking, grade management, role-based access control for administrators and faculty, data export, and interactive analytics dashboards with RESTful API architecture.

CERTIFICATIONS

- The Complete Web Developer Bootcamp** — *Udemy* — Full Stack Development with React, Node.js & MongoDB
- JavaScript Algorithms and Data Structures** — *freeCodeCamp* — Problem Solving, ES6+, OOP & Functional Programming
- Python for Everybody Specialization** — *Coursera (University of Michigan)* — Python Programming & Web Services
